Bland continues expanding its real estate market by launching the "Mori Condominium" project featuring condominium units with Japanese minimalist interior design at an affordable price starting at only 849,000 baht

Bangkok Land Public Company Limited, one of the leading real estate developers in Thailand, announces the expansion of its real estate market by launching the latest project, "Mori Condominium", with a total value of 1.8 billion baht. The project is located in a prime location in the heart of Muang Thong Thani under the concept of "Back to nature... the simplicity of life." All the units are unique with an elegant style of Japanese minimalist interior design. There are 7 different unit types with the living areas ranging from 28.06 - 61.08 sq.m., starting at only 849,000 baht or about 30,000 baht/sq.m. including a free set of rubberwood furniture with a warm and relaxing minimalist tone. There are all the necessary facilities and services provided, including 35% of indoor and outdoor parking areas as well as an easy commute that meets the needs of the residents and fits the lifestyles of all target groups. It is open for reservation now, and the construction is expected to be completed by 2023.

Mr. Peter Kanjanapas, Chairman of Bangkok Land Public Company Limited, said, "The COVID-19 pandemic has greatly affected the country's economy and people's lives. The Company is well aware of that and determined to bring back joy and better quality of life for Thai people. We have developed a residential project, "Mori Condominium," to accommodate the needs of those who want to own a new house with an affordable budget of lower than a million baht, where they can enjoy a relaxing and cozy living every day. There is a common area for everyone, especially the lush courtyard that reflects the word "Mori" which means "forest." Mori can also be a good investment for the investors as this project is located in the vicinity of various facilities such as IMPACT Arena, Exhibition and Convention Center, department stores, shopping malls, leading restaurants, hotels, banks, government offices, hospitals, and educational institutions. It takes only a few minutes to get to any of these places. There are also several entrances to the project from different directions. It is close to the Muang Thong expressway and the MRT Pink Line which will be open for trial operations early next year. In addition, the Company has also invested in extending two more stations into Muang Thong Thani, which is expected to be completed in the next 2 years."

The "Mori Condominium" project is a 16-story residential building with a total of 1,040 units and a living area ranging from 28.06 - 61.08 sq.m. The condominium units have incorporated the Japanese minimalist interior design to deliver an elegant and warm atmosphere with the facilities and services to cater to every need. There are 20 units of leading stores, hallways, a lush courtyard, swimming pools for adults and kids, a gym, 35% of the indoor and outdoor parking area, 24/7 security service with CCTV, and key card access. It also offers an easy commute as it is close to the Muang Thong expressway, and the MRT Pink Line with the extended two stations into Muang Thong Thani: IMPACT Muang Thong Thani Station (Challenger) and Muang Thong Thani Lakeside Station. It is also near many shopping venues such as Cosmo Bazaar, BEEHIVE Lifestyle Mall, The Portal, and Outlet Square. This is a perfect place for residents and investors who would like to invest in a promising project.
